

Acceptance Testing

UAT Execution & Report Submission

Date	30 September 2026
Team ID	SWTID-2026-4498
Project Name	Import Data using Transform Maps
Maximum Marks	4 Marks

1. Purpose

The purpose of this document is to briefly explain the test coverage, test results, and open issues of the **Import Data Using Transform Maps** project at the time of release for User Acceptance Testing (UAT). The project is tested to verify that data can be successfully imported from an external data source into a ServiceNow target table using **Import Sets and Transform Maps**, with proper field mapping, data transformation, and validation.

2. Defect Analysis

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	1	1	1	3
Duplicate	0	0	1	0	1
External	0	0	0	1	1
Fixed	1	2	3	2	8
Not Reproduced	0	0	1	0	1
Skipped	0	0	0	1	1
Won't Fix	0	0	1	0	1
Totals	1	3	7	5	16

Defect Summary:

Most of the identified defects were related to field mapping, data format, and validation. The major defects were fixed and the remaining low-severity issues were documented for future improvement.

3. Test Case Analysis

Section	Total Cases	Not Tested	Fail	Pass
Import Data Source	4	0	0	4
Import Set	4	0	0	4
Transform Map	6	0	0	6
Field Mapping	5	0	0	5
Data Transformation	4	0	1	3
Target Table Validation	4	0	0	4

Error Handling	3	0	0	3
Total	30	0	1	29

Test Case Summary

The UAT confirmed that the **Import Data Using Transform Maps** functionality works correctly for the major scenarios. Data was successfully imported into the target table, field mappings were verified, and transformed values were validated. One test case related to data transformation initially failed and was identified for correction.

4. Final UAT Report

Test Result	Count
Total Test Cases	30
Passed	29
Failed	1
Not Tested	0
Pass Percentage	96.67%

Conclusion:

The UAT testing of the **Import Data Using Transform Maps** project was completed successfully. The core functionality of importing, mapping, transforming, and validating data was verified. The identified issue is documented for resolution before the final release.
