

Project Executable Files

Date	01 October 2026
Team ID	SWTID-2026-4498
Project Name	Import data using Transform Maps
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Import data using Transform Maps (Update Set)
/Data Source - User Import (CSV / Excel file)
/Import Set Table - u_user_import (staging table)
/Transform Map - User Import -> sys_user
/Field Maps - name, email, employee ID, phone, manager
/Transform Scripts - onBefore and field scripts (cleansing, validation)
/Script Include - DataImportUtil (shared functions)
/Scheduled Import - Daily User Import
/Sample Data - users.csv (test data)

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://dev447766.service-now.com/now/nav/ui/classic/params/target/ui_page.do%3Fsys_id%3D6048828367031007bcc265eeaad34a
Login Credentials (Demo)	Username: sarudharshinib@gmail.com password : Saru2007@
Platform / Hosting Provider	ServiceNow Personal Developer Instance (PDI)
Repository Link	https://github.com/S-doll07/Import-Data-using-Transform-Maps.git
Demo Video Link	https://drive.google.com/file/d/1NfjB0lsE0yE642P0S1gS06VRfcI_tXi/view?usp=sharing

Step 4: Run Instructions

Pre-requisites: ServiceNow Personal Developer Instance (PDI) with admin role, a modern web browser, and the sample CSV / Excel file. Step 1: Log in to the ServiceNow instance as admin. Step 2: Go to System Import Sets > Administration > Data Sources and create the Data Source; attach the CSV / Excel file. Step 3: Click Load All Records to load the data into the Import Set table (u_user_import). Step 4: Open the Transform Map (User Import -> sys_user) and verify the field maps and the coalesce field. Step 5: Click Transform and review the Transform History and Import Log. Step 6: Open the target table (sys_user) and confirm the records were inserted / updated.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Very large files may make the import slow or time out.	Split the file into smaller batches or use a Scheduled Import.
2	Reference fields (e.g., Manager) fail if the referenced record is missing.	Load referenced records first; invalid rows are skipped and logged.
3	Only CSV / Excel sources are configured.	REST / JDBC sources planned as a future enhancement.
