

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	01 October 2026
Team ID	SWTID-2026-4498
Project Name	Import data using Transform Maps
Maximum Marks	4 Marks (Part A) + 3 Marks (Part B)

Part A: Brainstorm & Idea Prioritization

Brainstorm & Idea Prioritization :

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Import data using Transform Maps

Brainstorming session of Team SWTID-2026-4498 on moving spreadsheet data into ServiceNow.

01 October 2026
5 team members
ServiceNow PDI (dev447766)

A

Team gathering

The five team members met and agreed on one problem to solve.

Participants

☐ **Sarah Christa T**
Team Leader & Project Coordination Lead

☐ **Saravanan K**
Quality Assurance & Presentation Support

☐ **Sarudharshini B**
Project Developer & Technical Documentation Lead

☐ **Sathya Priya R**
Data Validation & Testing Lead

☐ **Selva Karthiga B**
Reports, Dashboard & Documentation Support

1

Define your problem statement

Frame the problem as a How Might We statement. This is the focus of the brainstorm.

PROBLEM

How might we import bulk employee and training data from spreadsheets into ServiceNow accurately, without duplicate records?

Key rules of brainstorming

☐ Stay in topic.

☐ Encourage wild ideas.

☐ Defer judgment.

☐ Listen to others.

☐ Go for volume.

☐ If possible, be visual.

Problem statement: How might we import bulk employee and training data from spreadsheets into ServiceNow accurately, without duplicate records?

Team: Sarah Christa T (Team Leader), Saravanan K, Sarudharshini B, Sathya Priya R and Selva Karthiga B.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Each member wrote down ideas that address the problem statement.

10 minutes

Sarah Christa T

Saravanan K

Sarudharshini B

Sathya Priya R

Selva Karthiga B

3

Group ideas

Similar ideas were clustered and each cluster was given a label.

20 minutes

Data Import

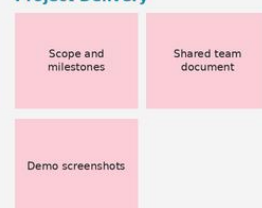

Data Quality

Visibility & Access

Project Delivery

Idea clusters: Data Import (Load Data into a staging table, Transform Map field maps, custom target tables, Excel / CSV source); Data Quality (Coalesce on Employee ID, compare counts with the sheet, Transform History and Import Log, test cases); Visibility & Access (pie chart by department, Employee Analytics Dashboard, Hr Manager role); Project Delivery (scope and milestones, shared team document, demo screenshots).

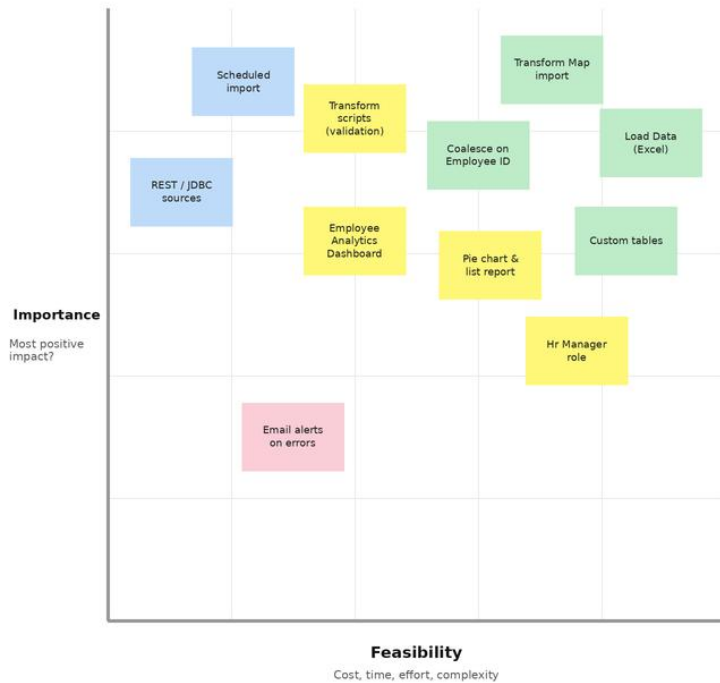

Step-3: Idea Prioritization

4

Prioritize

Ideas placed on the grid to decide which are important and which are feasible.

20 minutes

Selected ideas: Import data with Load Data and a Transform Map, create custom target tables, and use Coalesce on Employee ID were rated high on both importance and feasibility. Reports, the dashboard and the Hr Manager role followed. Scheduled import, transform scripts, REST / JDBC sources and email alerts were placed as future enhancements.

Part B: Brainstorming & Idea Prioritization

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Sarah Christa T	Set scope and milestones for the import project	Planning	4
2	Sarah Christa T	Use an Excel / CSV spreadsheet as the source data	Data Import	1
3	Sarah Christa T	Share one team document for all project updates	Documentation	4
4	Saravanan K	Check each load in the Import Log	Data Quality	2
5	Saravanan K	Write test cases for load and transform	Testing	2
6	Saravanan K	Prepare demo screenshots as a backup	Demo	4
7	Sarudharshini B	Load Data into a staging (import set) table	Data Import	1
8	Sarudharshini B	Create a Transform Map with field maps	Data Import	1
9	Sarudharshini B	Create custom tables for the target data	Data Import	1
10	Sathya Priya R	Use Coalesce on Employee ID to avoid duplicates	Data Quality	2
11	Sathya Priya R	Compare record counts with the source sheet	Data Quality	2
12	Sathya Priya R	Review Transform History after each run	Data Quality	2
13	Selva Karthiga B	Pie chart of employees by department	Reporting	3
14	Selva Karthiga B	Employee Analytics Dashboard	Reporting	3
15	Selva Karthiga B	Hr Manager role for access control	Access Control	3

Group names: Group 1 - Data Import; Group 2 - Data Quality; Group 3 - Visibility & Access; Group 4 - Project Delivery. These match the clusters in Part A.

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility (High / Medium / Low)	Importance (High / Medium / Low)	Priority	Selected (Yes / No)
1	Import spreadsheet data into custom tables using Load Data and a Transform Map	High	High	1	Yes
2	Prevent duplicates with Coalesce on Employee ID and verify loads using Transform History and Import Log	High	High	2	Yes
3	Build reports and the Employee Analytics Dashboard, with access given through the Hr Manager role	High	Medium	3	Yes
4	Plan project delivery: scope, shared documentation and demo screenshots	High	Medium	4	Yes

Ideas for future enhancement (scheduled import, transform scripts for validation, REST / JDBC sources and email alerts on errors) were not selected for this phase and are kept as future enhancements.
