|---------------|----------------------------------|
| Date          | 01 October 2026                  |
| Team ID       | SWTID-2026-4498                  |
| Project Name  | Import data using Transform Maps |
| Maximum Marks | 1 Mark                           |

### Demonstration of Proposed Features:

| S.No | Feature Name                    | Description                                                                                                                                                 | Status (Implemented / Partial / Pending) | Demonstrated (Yes / No) | Remarks                                                                                                                     |
|------|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| 1    | Custom Tables                   | Employee Test (u_employee_test) and Employee Training Records (u_employee_training_records) tables created with string, date, choice and reference columns. | Implemented                              | Yes                     | Both tables created; Employee column references sys_user (Figure 5).                                                        |
| 2    | Form Layout Configuration       | Employee Training Records form arranged with split sections for a clean two-column view.                                                                    | Implemented                              | Yes                     | Layout verified on the record form (Figures 6 and 7).                                                                       |
| 3    | Spreadsheet Load (Import Set)   | Excel file loaded through Load Data into the staging table u_employee_import.                                                                               | Implemented                              | Yes                     | Processed 5, inserts 5, errors 0 (Figure 8).                                                                                |
| 4    | Transform Map and Field Maps    | Source fields mapped to target fields (u_employee, u_training_name, u_completion_date, u_status).                                                           | Implemented                              | Yes                     | 4 field maps present (Figure 10). Employee reference was empty in the sample record.                                        |
| 5    | Transform Execution and History | Transform run on an import set; results reviewed in Transform History and Import Log.                                                                       | Implemented                              | Yes                     | ISSET0010002 completed with Success (Figure 11).                                                                            |
| 6    | Coalesce                        | Prevents duplicate records by updating existing rows that match on a key field (Employee ID).                                                               | Partial                                  | No                      | Coalesce is still false on all field maps, so duplicates exist (Figure 15). Enabling it on Employee ID is the pending step. |
| 7    | Reports                         | Pie chart (Employees by Department), bar chart and list report created on Employee Test data.                                                               | Implemented                              | Yes                     | Pie shows ServiceNow = 11 (100%); list shows 11 of 11 records (Figures 13-15).                                              |
| 8    | Dashboard and Roles             | Reports consolidated in the Employee Analytics Dashboard; Hr Manager role used for access.                                                                  | Implemented                              | Yes                     | Hr Manager role assigned to backup user (Figures 3 and 4).                                                                  |

**Feature Implementation Summary:**

|                                 |                                           |
|---------------------------------|-------------------------------------------|
| <b>Total Features Proposed</b>  | 8                                         |
| Total Features Implemented      | 7 fully implemented, 1 partial (Coalesce) |
| Total Features Demonstrated     | 7 of 8                                    |
| Overall Implementation Rate (%) | 87.5% (7 of 8 fully implemented)          |
