

Coding & Solution

Date	01 October 2026
Team ID	SWTID-2026-4498
Project Name	Import data using Transform Maps
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	ServiceNow instance (update set export) – [paste your instance / GitHub link here]
Programming Language(s)	JavaScript (ServiceNow server-side scripting – Glide API); CSV / Excel as source data format
Framework(s) Used	ServiceNow Now Platform – Data Sources, Import Sets, Transform Maps, Script Includes and Scheduled Imports
Key Features Implemented	- Data Source configured to load CSV / Excel files into an Import Set staging table - Transform Map with field maps from the staging table to the target table (sys_user) - Coalesce on Email / Employee ID to update existing records and avoid duplicates - onBefore and field-level transform scripts for data cleansing and validation - Error handling and logging, with invalid rows skipped and reviewed in the Import Log - Scheduled Data Import for automatic recurring loads
Pending / Incomplete Features	- Additional data sources (REST / JDBC) not yet configured - Email notification for failed imports - Dashboard for monitoring import history
Setup / Run Instructions	- Log in to the ServiceNow instance with admin access. - Go to System Import Sets > Administration > Data Sources and create the Data Source. - Attach the CSV / Excel file and click Load All Records to fill the Import Set table. - Create the Transform Map, add field maps and set the coalesce field. - Click Transform, then verify the records in the target table and Transform History. (Optional) Create a Scheduled Import to automate the load.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	
2	Meaningful variable and function names are used	
3	Code includes comments / documentation where necessary	
4	Error handling is implemented for critical operations	
5	The application runs without critical errors	
6	Code is committed to a version control repository	

Additional Notes / Comments:
