

## No. of Functional Features Included in the Solution

|                      |                                  |
|----------------------|----------------------------------|
| <b>Date</b>          | 01 October 2026                  |
| <b>Team ID</b>       | SWTID-2026-4498                  |
| <b>Project Name</b>  | Import data using Transform Maps |
| <b>Maximum Marks</b> | 5 Marks                          |

### Functional Features Overview:

| S.No | Feature Name                    | Feature Description                                                                | Module / Component                 | Status (Done / In Progress / Pending) | Marks Contribution |
|------|---------------------------------|------------------------------------------------------------------------------------|------------------------------------|---------------------------------------|--------------------|
| 1    | Data Source Configuration       | Defines the CSV / Excel file as the source of data to be imported.                 | Data Sources                       | Done                                  |                    |
| 2    | Import Set Staging Load         | Loads the source records into an Import Set staging table.                         | Import Sets                        | Done                                  |                    |
| 3    | Transform Map & Field Mapping   | Maps staging table fields to the target table (sys_user).                          | Transform Maps                     | Done                                  |                    |
| 4    | Coalesce (Duplicate Prevention) | Updates existing records instead of creating duplicates using Email / Employee ID. | Field Maps                         | Done                                  |                    |
| 5    | Data Cleansing Scripts          | onBefore and field scripts clean and validate data before it is saved.             | Transform Scripts / Script Include | Done                                  |                    |
| 6    | Error Handling & Logging        | Skips invalid rows and records errors for review.                                  | Import Log                         | Done                                  |                    |
| 7    | Scheduled Data Import           | Runs the import automatically at set intervals.                                    | Scheduled Imports                  | Done                                  |                    |
| 8    | Transform Result Verification   | Checks inserted / updated records and results after each run.                      | Transform History                  | Done                                  |                    |

### Feature Summary:

| Metric                             | Count / Value |
|------------------------------------|---------------|
| Total Features Planned             | 8             |
| Total Features Implemented         | 8             |
| Core / Must-Have Features          | 6             |
| Additional / Nice-to-Have Features | 2             |
| Features Tested & Verified         | 8             |

### Feature Category Breakdown:

| S.No | Category                  | Features in Category | Example Features                                                         |
|------|---------------------------|----------------------|--------------------------------------------------------------------------|
| 1    | User Interface (UI)       | 1                    | Transform Result Verification (Transform History and target table lists) |
| 2    | Backend / Logic           | 4                    | Transform Map, Coalesce, Data Cleansing Scripts, Error Handling          |
| 3    | Database / Storage        | 1                    | Import Set staging table loading                                         |
| 4    | API / Integration         | 2                    | Data Source (CSV / Excel), Scheduled Data Import                         |
| 5    | Security / Authentication | 0                    | Not in scope; default ServiceNow roles and access are used               |
